### <u>Independent Auditor's Report</u>

The Honorable Brian P. Kemp, Governor of Georgia
Members of the General Assembly of the State of Georgia
Board of Commissioners of the Peace Officers' Annuity and Benefit Fund of Georgia
Mr. Robert Carter, Secretary/Treasurer

### Report on the Financial Statements

We have audited the accompanying financial statements of the Peace Officers' Annuity and Benefit Fund of Georgia (the Fund), a component unit of the State of Georgia, as of and for the year ended June 30, 2018, and the related notes to the financial statements, which collectively comprise the Fund's basic financial statements as listed in the table of contents.

### Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

### Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

### **Opinion**

In our opinion, the financial statements referred to above present fairly, in all material respects, the fiduciary net position of the Fund as of June 30, 2018, and the changes in fiduciary net position for the year then ended in accordance with accounting principles generally accepted in the United States of America.

### Other Matters

### Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the Schedule of Employers and Nonemployers' Net Pension Liability, Schedule of Changes in Employers' and Nonemployers' Net Pension Liability, Schedule of Employer and Nonemployer Contributions, and Schedule of Investment Returns on pages 23-28 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Management has omitted the management's discussion and analysis that accounting principles generally accepted in the United States of America require to be presented to supplement the basic financial statements. Such missing information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate

operational, economic, or historical context. Our opinion on the basic financial statements is not affected by this missing information.

### Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated May 31, 2019 on our consideration of the Fund's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Peace Officers' Annuity and Benefit Fund's internal control over financial reporting and compliance.

Respectfully submitted,

Green Striff

Greg S. Griffin

State Auditor

May 31, 2019

### Notes to Financial Statements

June 30, 2018

### **Note 1: Plan Description**

The Peace Officers' Annuity and Benefit Fund of Georgia (the Fund) was created in 1950 by the Georgia General Assembly to provide retirement benefits for qualifying peace officers. The Fund administers a cost-sharing, multiple-employer defined benefit pension plan as defined in Governmental Accounting Standards Board (GASB) Statement No. 67, Financial Reporting for Pension Plans – an amendment of GASB Statement No. 25.

The Fund is governed by its Board of Commissioners. The Board is comprised of the Governor of the State of Georgia or his designee; an appointee of the Governor other than the Attorney General; the Commissioner of Insurance or his designee; and three active or retired peace officers appointed by the Governor. The Board of Commissioners is ultimately responsible for the administration of the Fund.

### Eligibility and Membership

Individuals eligible to apply for membership in the Fund are defined in the Official Code of Georgia Annotated (O.C.G.A.) 47-17-1 and generally include: any individual employed by the State of Georgia or any municipality, county, or other political subdivision thereof for the preservation of public order, the protection of life and property or the detection of crime; wardens and correction officers of correctional institutions; full-time parole officers; other individuals employed full-time for the purpose of law enforcement; and full-time employees of the Fund.

As of June 30, 2018, participation in the Fund is as follows:

Inactive members and beneficiaries currently receiving benefits	6,145
Terminated members not yet receiving benefits, vested	1,471
Active plan members	13,113
Total	20,729

### Participating Employers and Other Contributing Entities

At June 30, 2018, the active members of the Fund were employed by 640 employers. The Fund also had 1 nonemployer contributing entity, which is the State of Georgia.

### Retirement Benefits

The Fund provides retirement as well as disability and death benefits. Title 47 of the O.C.G.A. assigns the authority to establish and amend the provisions of the Fund to the General Assembly. A member is eligible to receive retirement benefits with 30 years of service, regardless of age. A member is also eligible to receive retirement benefits at age 55 with 10 years of service; however, members joining on or after July 1, 2010, must have 15 years of service to be eligible for benefits.

(A Component Unit of the State of Georgia)

### Notes to Financial Statements

June 30, 2018

A member must have terminated his or her active employment as a peace officer to receive benefits.

The monthly benefit is a single life annuity payable in monthly payments for the life of the member only. The monthly payment amount at June 30, 2018, was \$24.41 per month (plus 1/12 of this amount for each month of any partial year) for each full year of creditable service up to a maximum of 30 years of total service. The Board of Commissioners is authorized to provide for increases effective as of January 1 and July 1 of each year up to 1.5% of the maximum monthly retirement benefit then in effect. Members may elect, as an alternate to the benefit described above, to receive a 100% joint life annuity payable during the life of the member or the member's spouse, or a contingency life annuity with a 50% monthly payment to the surviving spouse. The amount of the benefit for these options is an actuarially reduced portion of the single life annuity benefit described above.

### Death and Disability Benefits

Any dues paying member who became a member prior to July 1, 1993, and becomes totally and permanently disabled is entitled to receive disability benefits, the amount of which is dependent upon the date of application for disability benefits.

If a member dies before retirement, the beneficiary is entitled to a lump sum of \$3,500. If a member dies in the line of duty and has a designated beneficiary, that beneficiary is eligible to receive a lump sum benefit of \$5,500 to be reduced (to no less than \$2,500) by the amount of any disability benefits received for the causative injury, as described above. If a member dies after retirement, the death benefit of the designated beneficiary is dependent on the amount of retirement benefits previously received by the deceased member. If the deceased member had received \$1,000 or more, the beneficiary is entitled to receive a lump sum of \$2,500. If the deceased member had received less than \$1,000, the beneficiary is entitled to receive an amount that when added to the amount previously received by the deceased member will total \$3,500.

### **Terminations**

At any time before a member begins drawing retirement benefits, the member may request a refund of 95% of all member contributions paid into the Fund during creditable service. No interest is paid on these withdrawals.

### **Contributions**

The Fund is funded by member and nonemployer contributing entity (Nonemployer) contributions. Contribution provisions are established by statute and may be amended only by the General Assembly.

(A Component Unit of the State of Georgia)

### Notes to Financial Statements

June 30, 2018

Member Contributions: Member contribution requirements are set forth in O.C.G.A. 47-17-44 and are not actuarially determined. Each member must contribute \$20 per month, to be paid no later than the tenth day of each month.

Nonemployer Contributions: In accordance with O.C.G.A. 47-17-60, the State of Georgia provides nonemployer contributions to the Fund through the collection of fines and forfeitures. For each criminal and quasi-criminal case involving the violation of State of Georgia laws, county ordinances, or municipal ordinances, courts collect and remit the following amounts:

For fines and bond forfeitures in excess of \$4, but not more than \$25	\$3
For fines and bond forfeitures in excess of \$25, but not more than \$50	\$4
For fines and bond forfeitures in excess of \$50, but not more than \$100	\$5
For fines and bond forfeitures in excess of \$100	5%

The fines and forfeitures are considered employer contributions for the purpose of determining whether the Fund has met minimum funding requirements specified in O.C.G.A. 47-20-10. This statute also prohibits any action to grant a benefit increase until such time as the minimum annual contribution requirements meet or exceed legislative requirements. The actuarial valuation as of June 30, 2018, calculated the minimum employer contribution for the fiscal year ended June 30, 2018, as \$11,350,828. The fines and forfeitures revenue of \$13,825,699 for the fiscal year ended June 30, 2018, did meet the minimum required fund contribution.

### Administrative Expenses

Administrative expenses are generally funded from current member and nonmember contributions. Investment earnings may be utilized to fund any expenses in excess of contributions.

### Note 2: Summary of Significant Accounting Policies and Plan Asset Matters Basis of Accounting

The Fund's financial statements are prepared on the accrual basis of accounting, except for the collection of contributions, which are recognized when collected from the members and the courts. Any accrual of these contributions would be immaterial to the Fund's financial statements. Retirement and refund payments are recognized as deductions when due and payable.

### Reporting Entity

The Fund is a component unit of the State of Georgia; however, it is accountable for its own fiscal matters and presentation of its separate financial statements. The Fund has considered potential component units under GASB Statements No. 61, The Financial Reporting Entity's Omnibus – an amendment of GASB Statements No. 14 and No. 34, and GASB Statement No. 39, Determining

(A Component Unit of the State of Georgia)

### Notes to Financial Statements

June 30, 2018

Whether Certain Organizations are Component Units, and determined there were no component units of the Fund.

### Cash and Cash Equivalents

Cash and cash equivalents, reported at cost, include cash on deposit at banks, cash on deposit with the investment custodian earning a credit to offset fees, and short-term highly liquid financial securities with original maturities of three months or less from the date of acquisition.

### Investments

Investments are reported at fair value. Equity securities traded on a national or international exchange are valued at the last reported sales price. Fixed income securities are valued based primarily on quoted market prices provided by independent pricing sources. Global foreign exchange holdings are translated using a third-party vendor. Investment income is recognized as earned by the Fund. There are no investments in, loans to, or leases with parties related to the Fund.

The Fund utilizes various investment instruments. Investment securities, in general, are exposed to various risks, such as interest rate, credit, foreign currency, and overall market volatility. Due to the level of risk associated with certain investment securities, it is reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the financial statements.

The Fund maintains an investment policy that may be amended by its Board of Commissioners both upon its own initiative and upon consideration of the advice and recommendations of its investment managers. There were no significant changes in the investment policy for the Fund during the fiscal year.

The Fund's policy regarding the allocation of invested assets is established on a cost basis in compliance with State law. Plan assets are managed on a total return basis with a long-term objective of achieving and maintaining a fully funded status for the benefits provided through the pension plan. The following was the Fund's adopted asset allocation policy as of June 30, 2018:

Asset Class	Target Allocation
Fixed income	20% - 40%
Equities	30% - 75%
Cash and cash equivalents	0% - 10%
Total	100%

Approximately 6.6% of the investments held in trust for pension benefits are invested in debt securities of the U.S. government and its instrumentalities, of which 3.6% are U.S. government debt securities and 3.0% are debt securities of the U.S. government instrumentalities. The Fund

(A Component Unit of the State of Georgia)

### Notes to Financial Statements

June 30, 2018

has no investments in any one organization, other than those issued by the U.S. government and its instrumentalities, that represent 5% or more of the plan's total investments.

For the year ended June 30, 2018, the annual money-weighted rate of return on pension plan investments, net of pension plan investment expense, was 7.89%. The money-weighted rate of return expresses investment performance, net of investment expense, adjusted for the changing amounts actually invested.

### Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of fiduciary net position and changes therein. Actual results could differ from those estimates.

### New Accounting Pronouncements

Pronouncements effective for the 2018 financial statements:

In June 2015, the GASB issued Statement No. 75, Accounting and Financial Reporting for Postemployment Benefit Plans Other Than Pension Plans effective for fiscal years beginning after June 15, 2017. This Statement addressed accounting and financial reporting for OPEB plans that are provided to the employees of state and local governmental employers. There are no applicable reporting requirements for the Fund related to this Statement.

In March 2017, the GASB issued Statement No. 85, *Omnibus 2017* effective for fiscal years beginning after June 15, 2017. This Statement addressed practice issues that have been identified during implementation and application of certain GASB Statements. A variety of topics are addressed including issues related to blending component units, goodwill, fair value measurement, and OPEB. The implementation of GASB Statement No. 85 did not impact the amounts recorded in the Fund's financial statements.

Pronouncements issued, but not yet effective:

In November 2016, the GASB issued Statement No. 83, Certain Asset Retirement Obligations effective for fiscal years beginning after June 15, 2018. This Statement addresses accounting and financial reporting for certain asset retirement obligations (AROs). An ARO is a legally enforceable liability associated with the retirement of a tangible capital asset. The Fund does not anticipate this statement to impact its financial statements and related reporting.

In January 2017, the GASB issued Statement No. 84, *Fiduciary Activities* effective for fiscal years beginning after December 15, 2018. The objective of this Statement is to improve guidance regarding the identification of fiduciary activities for accounting and financial reporting purposes

(A Component Unit of the State of Georgia)

### Notes to Financial Statements

June 30, 2018

and how those activities should be reported. The Fund is in process of evaluating the impact of this pronouncement on its financial statements.

In April 2018, the GASB issued Statement No. 87, *Leases* effective for fiscal years beginning after December 15, 2019, which provides guidance for lease contracts for nonfinancial assets – including vehicles, heavy equipment, and buildings – but excludes nonexchange transactions, including donated assets, and leases of intangible assets (such as patents and software licenses). The Fund is in the process of evaluating the impact of this pronouncement on its financial statements.

In April 2018, the GASB issued Statement No. 88, Certain Disclosures Related to Debt, including Direct Borrowing and Direct Placements, effective for fiscal years beginning after June 15, 2018. The purpose is to improve the information that is disclosed in notes to government financial statements related to debt, including direct borrowings and direct placements. It also clarifies which liabilities governments should include when disclosing information related to debt. The Fund is in the process of evaluating the impact of this pronouncement on its financial statements.

### Note 3: Investment Program

The Fund maintains sufficient cash to meet its immediate liquidity needs. Cash not immediately needed is invested as directed by the investment policy of the Fund. All investments are held by agent custodial banks in the name of the Fund. State statutes and the Fund's investment policy authorize the Fund to invest in a variety of short-term and long-term securities.

### Cash and Cash Equivalents

The Fund had cash on hand of \$140 at June 30, 2018.

The carrying amount of the Fund's operating account totaled \$240,021 at June 30, 2018, with an actual bank balance of \$318,937. This balance includes \$250,000, which is fully insured through the Federal Deposit Insurance Corporation, an independent agency of the U.S. Government. The remaining balance of \$68,937 is uncollateralized.

The carrying amount of the Fund's cash balances maintained within an investment account is \$241,405 at June 30, 2018. This balance includes \$131,783, which is fully insured through the Securities Investors Protection Corporation, an independent agency of the U.S. Government. This balance also includes \$109,622, which is held in British Pounds and is uncollateralized.

The Fund's investment policy authorizes investment in short-term highly liquid financial securities. At June 30, 2018, the Fund held \$6,744,252 in money market funds and \$14,942,037 in short term investment funds.

(A Component Unit of the State of Georgia)

### Notes to Financial Statements

June 30, 2018

### Investments

Fixed income investments are maintained in mutual funds, exchanged traded funds, municipal bonds, U.S. Treasury obligations, obligations unconditionally guaranteed by agencies of the U.S. Government, obligations of foreign governments, investment-grade corporate bonds, asset-backed securities, and mortgage-related securities.

Equity investments are maintained in mutual funds, exchange traded funds, domestic equities, international equities, and real estate investment trusts. Domestic equities are those securities considered by the O.C.G.A. to be domiciled in the United States. International equities are not considered by the O.C.G.A to be domiciled in the United States.

The equity portfolio is managed by the Fund in conjunction with independent advisors. Buy/sell decisions are based on securities meeting rating criteria established by the investment policy of the Fund. Equity trades are approved and executed by the independent advisors. Common stocks eligible for investment must meet the Objectives and Policies of the Fund's investment policy. State law limits the total investment in equity securities to 75% of the total invested assets calculated on a historical cost basis.

### Credit Risk

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations to the Fund. State law limits investments to investment grade securities. The Fund's investment policy requires that the bond portfolio be of high quality and chosen primarily with respect to the safety and liquidity of the investment and only secondarily by the yield available. The Fund's investment policy also requires that purchases of bonds be restricted to bonds rated as investment grade or higher quality as defined by a nationally recognized rating agency. Obligations of the U.S. Government or obligations explicitly guaranteed by the U.S. Government are not considered to have credit risk and do not require disclosure of credit quality.

The quality ratings of investments in fixed income securities at June 30, 2018, as described by Standard & Poor's, which is a nationally recognized statistical rating organization, are shown in the following table:

(A Component Unit of the State of Georgia)

### Concentration of Credit Risk

Concentration of credit risk is the risk of loss that may be attributed to the magnitude of the Fund's investment in a single issue. On June 30, 2018, the Fund did not have debt investments in any one organization, other than those issued or guaranteed by the U.S. Government or its agencies, which represented greater than 5% of plan's total investments.

(A Component Unit of the State of Georgia)

### Notes to Financial Statements

June 30, 2018

### Foreign Currency Risk

Foreign currency risk is the risk that changes in exchange rates will adversely impact the fair value of an investment. The Fund's currency risk exposures, or exchange rate risks, primarily reside within the Fund's international investment holdings. The Fund does not have a formal policy for managing foreign currency risk. As of June 30, 2018, the Fund's exposure to foreign currency risk in U.S. dollars, is highlighted in the following table:

## International Investment Securities at Fair Value as of June 30, 2018 Investment Type Cash and Cash Equivalents Subject to Foreign Currency Risk: British Pound \$ 109,622 Equities: Mutual Funds - International British Pound \$ 13,936,951 Stocks - International British Pound \$ 292,646 Total Investments subject to Foreign Currency Risk: \$ 14,339,219

(A Component Unit of the State of Georgia)

### Notes to Financial Statements

June 30, 2018

### Fair Value Measurement

The Fund categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The hierarchy is based on the inputs used in valuation and gives the highest priority to unadjusted quoted prices in active markets and requires that observable inputs be used in the valuations when available. The disclosure of fair value estimates in the hierarchy is based on whether the significant inputs into the valuation are observable. In determining the level of the hierarchy in which the estimate is disclosed, the highest level, Level 1, is given to unadjusted quoted prices in active markets and the lowest level, Level 3, to unobservable inputs. These guidelines recognize a three-tiered hierarchy, as follows:

Level 1 – Valuations based on unadjusted quoted prices for identical instruments in active markets.

Level 2 – Valuations based on quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations in which all significant inputs are observable.

Level 3 - Valuations based on inputs that are unobservable and significant to the overall fair value measurement.

In instances where inputs used to measure fair value fall into different levels in the fair value hierarchy, fair value measurements in their entirety are categorized based on the lowest level input that is significant to the valuation. The Fund's assessment of the significance of particular inputs to these fair value measurements requires judgement and considers factors specific to each investment.

(A Component Unit of the State of Georgia)

### Notes to Financial Statements

(A Component Unit of the State of Georgia)

### Notes to Financial Statements

June 30, 2018

Equity securities classified in Level 1 are valued using prices quoted in active markets for those securities.

Debt securities classified in Level 1 are valued using prices quoted in active markets. Debt securities classified in Level 2 are valued using either a bid evaluation or a matrix pricing technique. Bid evaluations may include market quotations, yields, maturities, call features and ratings. Matrix pricing is used to value securities based on the securities' relationship to benchmark quoted prices. These securities have nonproprietary information that was readily available to market participants, from multiple independent sources, which are known to be actively involved in the market.

Mutual funds classified in Level 1 are valued using prices quoted in active markets for those investment types. Mutual funds classified in Level 2 are valued using observable underlying inputs that are market corroborated.

The Fund did not have any Net Asset Value (NAV) investments at June 30, 2018.

### Note 4: Net Pension Liability of Employers and Nonemployers

The components of the collective net pension liability of the participating employers and nonemployers at June 30, 2018, were as follows:

Total pension liability	\$ 781,280,969
Plan fiduciary net position	(795,272,812)
Net pension asset	\$ (13,991,843)

Plan fiduciary net position as a percentage of total pension liability

101.79%

### Actuarial assumptions

The total pension liability was determined by an actuarial valuation as of June 30, 2017, with update procedures used to roll forward the total pension liability to June 30, 2018. The roll forward calculation adds the normal cost (also called service costs), subtracts the actual benefit payments and refunds for the plan year, and then applies the discount rate for the year. This actuarial valuation used the following actuarial assumptions, applied to all periods included in the measurement:

Inflation 2.50% Salary increases N/A

Investment rate of return 6.50%, net of pension plan investment expense, including inflation

(A Component Unit of the State of Georgia)

### Notes to Financial Statements

June 30, 2018

Mortality rates were based on the RP-2014 Healthy Mortality Table with blue collar adjustments and generational mortality projection using the Conduent modified MP-2016 scale for healthy lives and the RP-2014 Disabled Retiree Mortality Table with generational mortality projection using the Conduent modified MP-2016 scale for disabled lives.

The actuarial assumptions used in the June 30, 2017 valuation were based on the results of an experience study covering the period June 30, 2008 through June 30, 2015.

The long-term expected rate of return on pension plan investments was calculated by the Fund's investment manager as 6.66% using a Monte Carlo simulation in which best-estimate ranges of expected future real rates of return (expected nominal returns, net of pension plan investment expense and the assumed rate of inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage. The Fund's administrator determined that 6.50% was a reasonable assumption for the long-term rate of return on plan assets based on the calculation by the Fund's investment manager. The target asset allocation and best estimates of arithmetic real rates of return for each major asset class are summarized in the following table:

Asset class	Target allocation	Long-term expected real rate of return*
Domestic fixed income	20 %	2.7 %
International fixed income	5	4.0
Domestic large equities	35	7.5
Domestic mid equities	8	8.4
Domestic small equities	7	8.6
Global equities	10	8.2
International equities	10	8.8
Commodities	5	6.4
Total	100 %	

<sup>\*</sup> Rates shown are net of the 2.50% assumed rate of inflation.

### Discount Rate

The discount rate used to measure the total pension liability was 6.50%, based on the expected long-term rate of return on pension investments of 6.66%, but assuming an annual rate of inflation of 2.50%. The projection of cash flows used to determine the discount rate assumes revenues will remain level. Based on those assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore,

(A Component Unit of the State of Georgia)

### Notes to Financial Statements

June 30, 2018

the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

Sensitivity of the net pension liability to changes in the discount rate

The following table presents the net pension liability of the Fund, calculated using the discount rate of 6.50%, as well as what the Fund's net pension liability would be if it were calculated using a discount rate that is 1-percentage-point lower (5.50%) or 1-percentage-point higher (7.50%) than the current rate:

	1%	Current	1%
	Decrease	discount rate	Increase
	(5.50%)	(6.50%)	(7.50%)
Employer's and nonemployers'			
net pension liability (asset)	\$ 68,860,892	(13,991,843)	(113,804,547)

### Note 5: Subsequent Events

During the fiscal year under review, Senate Bill 369 was passed, which added a fee to be collected by the Fund for nonemployers contributions of \$5 for pre-trial diversion cases. This bill is effective July 1, 2018.

During the fiscal year under review, the Board of Commissioners approved a 1.5% cost-of-living adjustment to the benefit terms effective July 1, 2018.

### Note 1: Schedule of Employers' and Nonemployers' Net Pension Liability

The components of the net pension liability as of the fiscal year end and the fiduciary net position as a percentage of the total pension liability as of that date are presented in this schedule. This trend information will be accumulated to display a ten-year presentation.

### Note 2: Schedule of Changes in Employers' and Nonemployers' Net Pension Liability

Net pension liability which is measured as the total pension liability less the amount of the fiduciary net position is presented in this schedule. This trend information will be accumulated to display a ten-year presentation.

### Note 3: Schedule of Employer and Nonemployer Contributions

The schedule presents the required contributions and the percentage of required contributions actually contributed.

### Note 4: Schedule of Investment Returns

The schedule presents historical trend information about the annual money-weighted rate of return on plan investments, net of plan investment expense. This trend information will be accumulated to display a ten-year presentation.

### Note 5: Actuarial Methods and Assumptions

Benefit changes: For fiscal year 2019, a 1.5% cost-of-living adjustment effective July 1, 2018.

Changes of assumptions: For fiscal year 2015, the mortality table was changed to the RP-2014 Healthy Mortality Table with blue collar adjustments and generational mortality projection using Scale MP-2014 for healthy lives and to RP-2014 Disabled Retiree Mortality Table with generational mortality projection using Scale MP-2014 for disabled lives.

For fiscal year 2017, the mortality table for healthy lives was updated to the RP-2014 Healthy Mortality Table with blue collar adjustments and generational mortality projection using with Conduent modified MP-2016 scale and the mortality table for disabled lives was updated to the RP-2014 Disabled Retiree Mortality Table with generational mortality projection using the Conduent modified MP-2016 scale. Also, the active retirement and termination rates were updated based on the results of an experience study covering the period June 30, 2008 through June 30, 2015. In addition, the discount rate was decreased from 7.00% to 6.50%.

(A Component Unit of the State of Georgia)

Notes to Required Supplementary Information

June 30, 2018

(Unaudited)

Methods and assumptions used in calculations of actuarially determined contributions: For fiscal years ending before June 30, 2015, the actuarially determined contribution in the Schedule of Employer and Nonemployer Contributions are calculated as of June 30, two years prior to the end of the fiscal year in which contributions are reported. Beginning with the June 30, 2015 fiscal year, the actuarially determined contribution is calculated as of June 30 of the prior fiscal year.

The following actuarial methods and assumptions were used to determine the most recently calculated actuarially determined contribution reported in the Schedule of Employer and Nonemployer Contributions:

Valuation date June 30, 2017
Actuarial cost method Entry age normal
Amortization method Level dollar, open

Remaining amortization period 30 years

Asset valuation method Actuarial value

Inflation rate 2.5% Salary increases N/A

Investment rate of return 6.5%, net of pension plan investment expense, including inflation

SECTION II – REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING
AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF
FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH GOVERNMENT
AUDITING STANDARDS

(This page intentionally left blank)

270 Washington Street, S.W., Suite 1-156 Atlanta, Georgia 30334-8400

GREG S. GRIFFIN STATE AUDITOR (404) 656-2174

Report on Internal Control Over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance with Government Auditing Standards

Independent Auditor's Report

The Honorable Brian P. Kemp, Governor of Georgia
Members of the General Assembly of the State of Georgia
Board of Commissioners of the Peace Officers' Annuity and Benefit Fund of Georgia
Mr. Robert Carter, Secretary/Treasurer

We have audited, in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the Peace Officers' Annuity and Benefit Fund of Georgia (the Pension Fund), a component unit of the State of Georgia, which include the statement of fiduciary net position as of June 30, 2018, the related statement of changes in fiduciary net position for the year then ended, and the related notes to the financial statements, which collectively comprise the Pension Fund's basic financial statements, and have issued our report thereon dated May 31, 2019.

### **Internal Control Over Financial Reporting**

In planning and performing our audit of the financial statements, we considered the Pension Fund's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Pension Fund's internal control. Accordingly, we do not express an opinion on the effectiveness of the Pension Fund's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

### **Compliance and Other Matters**

As part of obtaining reasonable assurance about whether the Pension Fund's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under Government Auditing Standards.

### Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with Government Auditing Standards in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

Respectfully submitted,

Greg Striff

Greg S. Griffin

State Auditor
